

Satelite radio has been the most wonderful companion in the car while i'm driving to work. My husband say every boss has to give their staffs satellite radio because you arrive at work feeling happy inside from all kind of music and entertainment. The instant traffic and weather channel is so helpful, and constantly give me review on what's happening infront of me. I must say it save people's life because they're able to avoid bad weather and bad traffic infront of them, really amazing. On regular radio, when you hear the news, it's already too late, you're already IN it. I even promote satellite radio for my boss and the reason he's interested and bought it is because the XM Instant Traffic and Weather, 24 hours non stop. I pay for this service and it's my right to choose what i want to hear and so far XM has given it to me, i'm very pleased. It gives better service and better in everything else compare to regular radio. Please FCC, reject the NAB's petition 04-160.
